EXAMINER

NGUYEN, STEVEN H D

ART UNIT PAPER NUMBER

2665

DATE MAILED: 09/14/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/632,954

Applicant(s)

BLACK ET AL.

Examiner

Steven HD Nguyen

Art Unit

2665

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-26 and 28 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-26 and 28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/29/05 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-26 and 28 rejected under 35 U.S.C. 103(a) as being unpatentable over Daly (USP 5748896) in view of Lewis (USP 6421719).

Regarding claims 1, 19, 21, 23 and 28, Daly discloses (Figs 1-11 and col. 1, lines 5 to col. 18, lines 67) a method of managing a telecommunications network comprising generating a plurality of user profiles each providing network management access to a user; each profile defining network management capabilities assigned to a respective user; adding a user profile to a network management system (Fig 5a, new user button is used to add new user profile); editing parameters within the user profile to establish management capabilities assigned to one or more users associated with the profile (Fig 5b-3 and Fig 5c used to edit the parameters for allowing the

Art Unit: 2665

user to established management capabilities), and a list of network devices capable of being managed or configuring through the scope of user profile (Fig 5a, 5B-1 and 5B-3 which include the servers that allows the user to set access level such read and write or read only; see col. 10, lines 28-66, col. 12, lines 8-21; col. 12, lines 66 to col. 13, lines 28); receiving input from a user through the user interface; configuring a network device “server which forwards the requested information by generating the data packets” from the list of network devices within the user profile in accordance with the management capabilities in the user profile (col. 12, lines 8-21, the user configures the hard drive or folder to be shared with the other users and set access level for the interface); provisioning services within a network device from the list of network devices within the user profile in accordance with the management capabilities in the user profile (col. 12, lines 8-21 discloses a network device is provisioned into a plurality of network services; Fig 5B-1). However, Daly does not disclose a management method for configuring the physical and logical of network devices that performing routing the packets. In the same field of endeavor, Lewis discloses a management method which allows a network administrator to add, delete users and configure the physical and logical of the switches, routers, bridges and hubs in the network based on the administrator profile and provision the services within a network device to route the packets (Col. 1, lines 37-63 and Col. 34-58, the switch is configured physical and logical of the switches to route the packets).

Since, Daly suggests a flexible method and system for integrating a new management method, device into a network without re-implementing the network. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to apply a method for configuring the physically and logically of the network devices as disclosed by Lewis

Art Unit: 2665

into the system and method of Daly. The motivation would have been to improve throughput of the network and reduce the transmission delay between the devices.

Regarding claims 2 and 18, Daly discloses providing network management access further comprises displaying a user interface is a graphical user interface (GUI) in accordance with the user profile (Fig 5).

Regarding claims 3 and 20, Daly discloses the network management system includes a plurality of user profiles and receiving a user name and password; comparing the received user name and password against user names and passwords stored in the plurality of user profiles; and displaying a user interface in accordance with a user profile including the received user name and password (Col 10, lines 45-54).

Regarding claim 4, Daly discloses defining management capabilities comprises assigning an access level corresponding to specific management capabilities (Fig 5).

Regarding claims 5-7, Daly discloses assigning an access level comprises assigning an administrator access level to permit a user to read and write physical and logical objects; a provisioned access level to permit a user to read physical objects and read and write logical objects; a customer access level to permit a user to read their logical objects (Fig 5b-3).

Regarding claim 14-17, Daly discloses setting network management policy flags within the user profile for setting a password control policy flag to enable a user to change a password within the user profile; setting an account disabled policy flag to disable the user profile and prevent access; setting an add device policy flag to enable a user to add network devices to the list of devices capable of being managed through the user profile (Fig 5 discloses a user set the flag for in the use profile for changing password, disable account and adding a network device).

Art Unit: 2665

Regarding claim 25, Daly discloses receiving user profile data from a user and modifying parameters within the user profile in accordance with the received user profile data (Fig 5c, receiving the parameters of the user profiles from the user and modifying the parameters in the user profile database according to the received information such password).

Regarding claim 26, Daly discloses copying the user profile to another user profile; and editing parameters within the other user profile to establish management capabilities and a list of network devices capable of being managed through the other user profile (Fig 5, Duplicate USER and modifying the parameters to create a new user).

Regarding claims 8-11, Daly and Lewis fail to disclose the claimed invention. However, the examiner takes an official notice that an advantage of providing a list of network address of the network devices wherein listing network devices further comprises listing an SNMP community string, retry value, timeout for each network device are well known and expected in the art at the time of invention was made to manage the network devices on the network.

Regarding claims 12-13, Daly and Lewis fail to fully disclose the claimed invention. However, the examiner takes an official notice that a method and advantage of designating a primary and secondary network management server associated with the user profile are well known in the art at the time of invention was made to implement a primary and backup server for allowing the user to access the network. The motivation would have been to reduce a down time of the network.

Regarding claim 22, Daly and Lewis fail to fully disclose claimed invention. However, the examiner takes an official notice that a method and advantage for enabling or disabling a port

Art Unit: 2665

of the network device is well known and expected in the art at the time of invention was made to provide a network security.

Regarding claim 24, Daly and Lewis fail to disclose the claimed invention. However, a method and system for allowing a network administrator to set up a SONET path within the network device is well known and expected in the art at the time of invention was made to implement a function into a terminal for allowing a user to set a SONET path according to the access level which is defined in the access control list.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Poisson (USP 6701358) discloses a method and system for managing the virtual network.

Orr (USP 5727157) discloses a method and system for determining a network topology.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven HD Nguyen whose telephone number is (571) 272-3159.

The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
